Aryan Trading Classes: Course Syllabus

DRAFT: replace this file with the client's official syllabus before launch (keep the file name public/aryan-trading-syllabus.pdf).

Stock Market Foundation (Beginner)

The base every trader needs, taught step by step.

- How exchanges, brokers and orders work
- Demat and trading account basics
- Reading price quotes and simple charts
- Charges, taxes and risk basics

Technical Analysis (Intermediate)

Read charts with a clear method instead of guesswork.

- Candlesticks, trends and support or resistance
- Common chart patterns
- Moving averages, RSI and volume
- Building your own trade checklist

Options Trading (Intermediate to advanced)

Understand options and their risk before you place a trade.

- Calls, puts, strike, premium and expiry
- Reading the option chain
- Option Greeks in simple terms
- Defined-risk strategies and expiry-day risks

Live Market Practice (Practice)

Apply what you learn in real market hours, with guidance.

- Supervised practice during market hours
- Paper trading and a trade journal
- Position sizing and risk rules
- Review sessions on your own trades

Education only. We do not provide stock tips, PMS or investment advisory services. Trading involves risk of loss.
